Question 1 ID: 269

Agile and DevOps are similar but differ in a few important aspect. Which statement is correct?

- A) Agile is a change of thinking whereas DevOps is actual organisation cultural change
- B) Agile is actual organisational cultural change whereas DevOps is a change of thinking.
- C) Agile is process driven whereas DevOps is role driven.
- D) Agile is role driven whereas DevOps is process driven.

Answers

- A) A
- B) B
- x**
- C) C
- D) D

Rationale

Answer A is correct.

DevOps and Change will both involve change. The adoption of Agile methods will require a change of thinking. The adoption of a DevOps approach will require cultural changes throughout the organisation.

Question 2 ID: 268

Which statement best describes the role of Change Management within a DevOps environment?

- A) Nothing changes as a risk adverse Change Management approach is paramount to IT and business success.

- B) The moment an app change is asked for, the request should go to the Developers to authorise. Once authorised it goes to Operations for implementation.
- C) The moment an app change is asked for, the request should go out to everyone on the team, no matter which IT discipline they work in.
- D) DevOps does not need Change Management?

Answers

A) A

B) B

✘

C) C

D) D

Rationale

Answer C is correct.

DevOps is about collaboration and communication. The Change Management will become more Agile to ensure that the process is fit for purpose.

Question 3 ID: 265
